

## PERL COURSE CONTENT

### ➤ CHAPTER 1. GETTING STARTED WITH PERL

- What is Perl?
- Where Can I Get Perl?
- A simple I/O
- Perl Variables
- Control Flow – Decision
- Control Flow – Loops
- Altering Loop Control Flow
- Statement Modifiers
- What Is True And What Is False?
- The Special Variable \$\_  
SOFT CRAYONS  
Tech Solution Private Limited

### ➤ CHAPTER 2. PERL OPERATORS

- Introduction
- Table Of Perl Operators
- Arithmetic Operators
- String Operators
- Relational Operators
- Logical Operators
- Bitwise Operators
- Assignment Operators
- The Conditional Operators
- Range Operators
- String Functions
- The eval Function

### ➤ CHAPTER 3. I/O

- Introduction
- String Literals

- The print Function
- Here Documents
- The printf Function
- The sprintf Function
- Filehandles
- Opening Disk Files
- File Open Errors
- The die and warn Function
- File Operators

### ➤ CHAPTER 4. ARRAYS

- Basic Concepts
- Assigning Values To An Array
- Accessing Array Elements
- Array Function
- Push and pop
- Shift
- Sort, reverse, and chop
- Split and join
- Grep
- Splice
- Command Line Arguments

### ➤ CHAPTER 5. ASSOCIATIVE ARRAYS

- Basic Concepts
- Associative Array Function
- Updating Associative Arrays

- Accessing Environment variables
- **CHAPTER 6. SUBROUTINES**
  - Calling Subroutines
  - Passing Arguments to Subroutines
  - Returning Values from Subroutines
  - They require Function Packages and Modules
  - The @INC Array
  - Predefined Subroutines
  - Comparison subroutines for Sorting
- **CHAPTER 7. PATTERN MATCHING AND REGULAR EXPRESSIONS**
  - Introduction
  - Regular Expression Syntax
  - The Match Operator
  - Regular Expression Meta-Characters
  - Anchors
  - Single character Matches
  - Some Special Issues
  - Character Classes
  - Multiple character Matches
  - Alternation
  - The substitution Operator
  - The Translation Operator
- **CHAPTER 8. Perl File I/O**
  - Opening and Closing Files
  - Reading and Writing Files
  - Copying Files
  - Renaming a Files
  - Deleting an existing file
