

NETWORK PROGRAMMING

About Course

Python Network Programming is about using python as a programming language to handle computer networking requirements. For example, if we want to create and run a local web server or automatically download some files from a URL with a pattern.

PYTHON NETWORK PROGRAMMING

CURRICULUM

Network Programming

Network Introduction

Network Environment

Internet Protocol

IP Address

DNS Lookup

Routing

HTTP Requests

HTTP Response

HTTP Headers

Custom HTTP Requests

Request Status Codes

HTTP Authentication

HTTP Data Download

Connection Reuse

Network Interface

Sockets Programming

HTTP Client

HTTP Server

Building URLs

WebForm Submission

Databases and SQL

Telnet

Email Messages

SMTP

POP3

IMAP

SSH

FTP

SFTP

Web Servers

Uploading Data

Proxy Server

Directory Listing

Remote Procedure Call

RPC JSON Server

Google Maps

RSS Feed
